Washington, D. C.

SUPPLEMENTS TO SCHEDULE OF COMMODITIES

The procedure pertinent to supplements to the booklet, "Schedule of Commodities," is revised to the extent that hereafter supplements to the schedule will be issued with a cover sheet or other explanation.

Supplements are made to insure that the factual digest setting forth details as to descriptions of all commodities available for sale or transfer is currently complete, does not contain incorrect descriptions, provides descriptions coextensive with operational requirements and price bulletins.

Supplemental sheets are for substitution or inclusion in the booklet, "Schedule of Commodities," as revised by supplemental sheets previously distributed. Since commodity descriptions have been listed in the schedule alphabetically by commodities under the appropriate agricultural classification or trade term applicable, supplemental sheets can be inserted in the booklet by utilizing the alphabetical listing as the guide for determining the place or point of insertion.

The date on which a supplement will be effective will be shown at the upper right hand corner of the sheet, e.g. "Effective 11-1-43," and all sheets superseded by the supplemental sheets should be removed from the booklet and filed in alphabetical sequence for possible future reference. In other words, the loose-leaf feature of the schedule will allow for a booklet that can be revised from time to time.

Effective 11-1-42
